SVNA Home Assistance is WAIVING our 3 hour minimum to help the elderly with any of the following in the coming weeks (these services will become available Monday, March 16, 2020)

All of the following are considered one hour visits:

- **Grocery Shopping:** The most vulnerable population is the elderly. Let our aide come to your house, get your list and shop for you.

- **Help with Facetiming your family or loved ones:** If your family cannot visit but you'd like to see them and make sure they are okay, allow us to assist you with setting up Facetime and getting you connected

- **Laundry:** Now, more than ever, laundry should be done quickly and should not be sitting waiting to be done. Let us come throw a load in, fold it and put it away

- **Meal Prep:** If you depend on someone to cook your meals but they either cannot come or are shut down for the short term, allow our aides to come and make you a homecooked meal. Want more than just one? We can make freezer meals with easy to follow, microwave or oven, instructions.

*Why trust our aides and Agency during this time?*

SVNA Home Assistance is being extremely proactive in working with the elderly. We are having all of our staff of 50+ caregivers come in to review our handwashing policies, what is means to be an essential employee and we are equipping them with the necessary supplies such as hand sanitizer. If our aides have been traveling domestically (heavily populated areas) or internationally, they are not allowed back to work for the first two weeks upon arrival and symptom free. If one of our aides call out ill, we have put in a new policy stating that regardless of the symptoms, they will need medical clearance to come back to work. We refuse to put our clients at risk and that is our number one goal!

**Call if you need us:** 860-435-1266
